To the reader:

The purpose of this letter is to provide mathematical proof that God truly exist. Such a proof is required to help any person who is not yet a believer of the Holy Bible.

Proof:

1. Consider existence of the **First Function** $f(x) \rightarrow x'$; where x is parameter of $f(x)$, and x' is the result of $f(x)$.
2. If God does not exist, then **God Quantity** $G = 0$. But if God does exist, then $G = 1$.
3. By the multiplicative identity rule, it is true that $f(x) = f(x) \times 1 = f(x)G$ if and only if $G = 1$.
4. In contrast, if God does not exist and $G = 0$, then $f(x)G = 0$.
5. Therefore, God must exist for the first function to exist. QED

God love you,

Br. Caleb
